CONTEMPORARY
WORLD GLOBES

Our aim at Atmosphere

Is to produce globes for everyone who wants a globe both as a beautiful work of art and as a quick and reliable source of geographical information.

Introducing Atmosphere Globemakers

We present our collection of stylish and contemporary globes which are created for ultimate visual impact. All maps are individually designed and our product range is manufactured to the highest possible standards.

Every home should have a globe both for decoration and, more importantly, for educational purposes. A globe is the only true representation of our planet and it offers the chance of gaining a real understanding of the distance between continents, the vast topographical diversity of countries and the scale of our planet's oceans.

Combining experience and creativity

Our experienced team continues our tradition of making the finest globes in the world. State of the art technology combined with continuous creative product development produce our uniquely distinctive range of globes.

Partnerships

Development Projects. Atmosphere works closely with cutting edge designers and engineers. Manufacturing. We guarantee that we select the most suitable materials of the highest quality. Our map printing is superb, our cartography is updated continuously.

Service

We at Atmosphere work closely with our customers to continuously improve logistics. We strive for the highest quality in every step of the development of our products and business.

Giacomo Mutti

Was born in Sarnico, Italy, in 1953. Since 1974 he has been designing toys, lighting, car accessories, household goods, sunglasses, fashion accessories and silver gift items for many world-class companies. He has special expertise in the injection moulding of plastics. His activities include teaching courses, seminars and conferences on design topics. He lives and works in Florence.

Henrik Holbæk and Claus Jensen

Danish designers Henrik Holbæk and Claus Jensen are better known as “Tools®”. Their work is appreciated internationally and has won them more than 300 awards and distinctions, making them amongst Denmark’s most awarded designers. The products of “Tool design” are typically simplistic and are said to have a touch of magic.

Kristoffer Zeuthen

Born 1971, Copenhagen, Denmark. Industrial designer. Has work within a wide range of design fields, from sport and medical products to table and houseware. He runs the design studio KILO ZULU.

Kent Andersen

Has been working with a wide range of design solutions ranging from medico-technical products, furniture to lifestyle products. He trained as a metal worker in 1994 and he received a degree in industrial design in 2001. He is co-founder of the multi-disciplinary design company BEMERK in 2003.

Walter Giovanniello

Product Designer “made in Italy” born 30 July 1984. His career as a designer has been influenced by university studies, professional training and work experience in the field of design in various locations such as Treviso (AV), Florence, Milano, Alessandria, Bologna and other areas of Italy. Walter has won several competitions in the field of design, his collaborations and work range from hand-made to industrial products in an endless quest for elegance, poetic irony and simplicity.

Atmosphere Design Team

Our in-house design team is a cooperation between various talented Danish industrial designers, who in collaboration have made design for a new world. This synergy was started with the aim of proposing the geographical globe as an object for interior decoration. Atmosphere NewWorld collection bring the globe to your home. Now there’s no excuse not to own one. Our picture of the world is never static.
